CAREER OBJECTIVE

Aspiring Data Analyst with expertise in Python, SQL, Excel, and Power BI, and a strong foundation in data analysis and visualization. Currently transitioning toward Data Science by building skills in Machine Learning, Statistics, and Predictive Analytics. Passionate about extracting meaningful insights from data, solving complex business challenges, and contributing to data-driven decision-making.

PROFESSIONAL EXPERIENCE

Apana Time 04/2024 – Present
Internship Remote

Data Analyst Intern | Apana Time

Duration: March 2026 – Present

- Collected, cleaned, and analyzed datasets using **Excel, SQL, and Python** to identify trends and business insights.
- Developed interactive dashboards and reports in **Power BI** to support data-driven decision-making.
- Performed data validation and preprocessing to improve data accuracy and quality.
- Generated weekly and monthly performance reports by analyzing key business metrics.
- Created visualizations and presented findings to help stakeholders understand data patterns and opportunities.
- Collaborated with team members on real-world analytics projects and business reporting tasks.

Skills Used: Python, SQL, Excel, Power BI, Data Cleaning, Data Visualization, Reporting, Dashboard Development

EDUCATION

Bachelor of Technology (B.Tech) 08/2024 – Present
Indo Global Group of Colleges, Chandigarh Chandigarh, India
Expected Graduation: 2028

Higher Secondary Certificate (HSC) 04/2021 – 04/2023
Inter Raj High School, Darbhanga Darbhanga

SKILLS

Technical Skills

- **Technical Skills**
 - Python (Pandas, NumPy, Matplotlib)
 - SQL (MySQL)
 - Microsoft Excel
 - Power BI
 - Data Cleaning & Transformation
 - Data Visualization
 - Exploratory Data Analysis (EDA)

CERTIFICATIONS

- Power BI Skill Course
- Gen Ai Study Jam 2024
- Sql Skill Course

PROJECTS

Expenses Management System

Python

- Developed a Python-based expense management system to track, categorize, and analyze personal and shared expenses.
- Implemented budgeting features and generated visual reports.

Translator App

Python

- Developed a Python-based translator application for multi-language text translation.
- Integrated translation APIs for efficient results.

Billing System

Python

- Developed a billing system to manage customer transactions and generate invoices.
- Automated calculations and improved accuracy in billing process.

Supply Chain Analytics Dashboard

Self Project

- esigned an interactive Power BI dashboard to monitor supply chain performance and inventory management.
- Analyzed sales, stock levels, demand trends, and warehouse operations using SQL and Excel.
- Identified products with high stockout risk and recommended inventory optimization strategies.
- Tracked key performance indicators (KPIs) such as sales volume, profit margins, and inventory turnover.
- Created visual reports to help stakeholders make data-driven business decisions.

Sales Performance Analysis

Self Project

- Collected and analyzed sales data using SQL, Excel, and Python.
- Performed data cleaning, transformation, and exploratory data analysis (EDA).
- Evaluated product-wise and category-wise sales performance.
- Identified top-performing products and revenue trends through dashboards and reports.
- Presented actionable insights using Power BI visualizations.
